

We Are Scheduling Our Fall Travel Schedule Now! Join Us!

Suicide is the most extreme and visible symptom of the larger mental health emergency we are so far failing to adequately address. As a school administrator you have so many issues coming at you from all directions, how do you adequately have the time or money to appropriately help your students who are struggling with depression, anxiety, bi-polar, bullying, and more? How can you make an impact on your students before one or more of them make the decision and follow through with suicide?

Please consider letting us help you. The TW Foundation is dedicated to providing hope and help for those struggling with depression, anxiety, addiction, PTSD, bi-polar disorder, self-injury, and suicide. One of our primary focus groups is youth and teens. We exist to encourage, inform, inspire and invest directly into lives, treatment, & recovery.

In the past year we have worked with over 50,000 youth and teens and have positively impacted lives across the nation. Our assemblies for your students are motivational, real, and life changing. We aren't out there providing a made up, feel good speech but instead we share real stories from the heart which the students understand and internalize. You can hear some of the feedback on our Executive Director's speaking engagements [here](#). Todd's assembly speeches have been described as fun, hilarious, energetic, motivational, life changing, and inspirational. When you have Todd come in to speak you can expect him to arrive early to meet with staff and discuss current issues/concerns being addressed by the school. He will walk the halls and engage students along with meeting with any who have mental health challenges they would like to discuss.

Our assistance doesn't end with only speaking at assemblies though. We can provide teacher training on recognizing the signs and symptoms of suicide. We also help school administration develop and implement Mental Health Committees. Our mission is to help those in need and one of our greatest tools has been partnering with schools such as yours.

We would love the opportunity to discuss how we help your school and partner with you to make this happen. We are currently working with schools across the country and beginning to plan our fall travel schedule. Please fill out [this form](#) or reach out to us today so we can discuss how we can team together, when is the best timing, and more!

Respectfully,

Todd Woodfill
